

Moe Larry Curly Shemp

The 4 Stooges

OF WATER DAMAGE

BEWARE...AS THESE 4 CULPRITS CAN QUICKLY WREAK HAVOC IN YOUR HOME

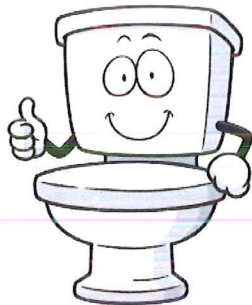

Washing Machine

A 5/8 inch supply line for washing machine moves 12 gallons per minute. This equals approx. **17,280 gallons** in 24hrs! That's an 18x4ft swimming pool dumping into your home!

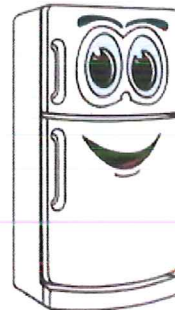

Water Heater

A 3/4 inch supply line for a water heater, moves 8 gallons of water per minute. This equals approx. **11,500 gallons** in 24hrs! NOT the way you wanted that indoor hot tub installed.

Toilet

A 3/8 inch supply line for a toilet, moves 3 gallons of water per minute. This equals approx. **4,300 gallons** in 24hrs. You just put a small lake in your living room!

Refrigerator

A 1/4 inch supply line from an icemaker, moves 1 gallon per minute. That equals approx. **1,440 gallons** in 24 hours! You would need a kayak to make breakfast in the morning.

Results If Waiting To Mitigate:

- Carpet Delaminating
- Secondary damage to furnishings
- Extreme damage to hardwood floors; cupping, crowning and buckling
- Foul odors resulting from standing water

Benefits To Mitigation:

- Prevents the damage from spreading further
- Lower loss claim with insurance company
